INVESTMENT OBJECTIVE AND STRATEGY

A Philippine Peso denominated Unit Investment Trust Fund (UITF) which aims to provide its participants an alternative outlet that offers earnings and liquidity. Investments will be primarily in various short-term fixed income instruments (Bonds/TD) with an average portfolio duration of less than one year.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Signature Trust Fund is suitable **only** for investors who:

- Have a conservative risk profile
- Have a short term horizon
- Who seek safe and liquid investments with yields higher than savings and time deposits

KEY RISK AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks

- **Interest Rate Risk.** This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
- **Market/Price Risk.** This is the possibility for an investor to experience losses due to changes in market prices of securities (e.g., bonds and equities). It is the exposure to the uncertain market value of a portfolio due to price fluctuations.
- **Liquidity Risk.** This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.
- **Reinvestment Risks.** This is the risk associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.
- **Credit/Default Risks.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other form of security which the borrower issued.
- **Other Risks.** This is the risk of potential conflict of interest in a related party transaction.

Market Update

Inflation accelerated to a five-year high of 5.2 percent in June from May's 4.6 percent. Year-to-date, inflation averaged 4.3 percent, above the Bangko Sentral ng Pilipinas' 2-4 percent target range. This was caused by the sustained elevated prices of food and sin products particularly tobacco and alcoholic beverages.

The PSE index closed June 2018 at 7,193.68, lower by 303.49 points, compared from the previous month. The Philippine Peso closed June 2018 at PHP53.34 against the US Dollar.

The country's gross international reserves (GIR) declined for the third straight month in June, slumping to the lowest level in six years due to the strong outflows and the weakening of the peso against the dollar, the BSP reported. The BSP said the GIR level amounted to \$77.67 billion as of end-June, \$1.53 billion lower than the revised May level of \$79.2 billion. This was the lowest since slumping to \$76.13 billion in June 2012.
